

TABLE OF CONTENTS

Acknowledgements.....	ii
To the Instructor and Student	v
To the Student	vi
CHAPTER 1: Chemistry is a Quantitative Science	
01-1 Units of Measurement	1
01-2 Unit Analysis	6
01-3 Significant Figures in Data	12
CHAPTER 2: Atoms and Elements	
02-1 Atoms, Isotopes, and Ions	17
02-2 Mass Spectrometry and Masses of Atoms	23
02-3 The Periodic Table of the Elements	28
CHAPTER 3: Molecules and Compounds	
03-1 Nomenclature: Naming Compounds	32
03-2 Representing Molecular Structures	38
03-3 Moles and Molar Mass	44
03-4 Determination of Chemical Formulas	51
CHAPTER 4: Reaction Stoichiometry	
04-1 Balanced Chemical Reaction Equations	58
04-2 Limiting Reactants	66
04-3 Solution Concentration and Dilution	73
04-4 Solving Solution Stoichiometry Problems	77
CHAPTER 5: Reactions in Aqueous Solution	
05-1 Dissociation and Precipitation Reactions	84
05-2 Introduction to Acid – Base Reactions	89
05-3 Electron Transfer Reactions	94
05-4 Analytical Titrations	105
CHAPTER 6: Energy and Chemical Reactions: Heat and Work	
06-1 Thermochemistry and Calorimetry	109
06-2 Internal Energy and Enthalpy	115
06-3 Hess's Law: Enthalpy is a State Function	122
06-4 Chemical Structures and Enthalpy	128
CHAPTER 7: Electron Configurations and the Periodic Table	
07-1 Electromagnetic Radiation	137
07-2 Atomic Spectroscopy and Energy Levels	142
07-3 Quantum Numbers for Electrons in Hydrogen Atoms	149
07-4 Multi-Electron Atoms, the Aufbau Principle, and the Periodic Table	160
07-5 Periodic Trends in Atomic Properties	168
CHAPTER 8: Covalent Bonding I	
08-1 The Chemical Bond	181
08-2 Lewis Model of Electronic Structure	184
08-3 Valence Shell Electron Pair Repulsion Model	199
08-4 Electronegativity and Bond Polarity	210
CHAPTER 9: Covalent Bonding II	
09-1 Hybridization of Atomic Orbitals	216
09-2 Valence Bond Model for Covalent Bonds	221
09-3 Molecular Orbital Theory	229
CHAPTER 10: Properties of Gases	
10-1 The Ideal Gas Law	238
10-2 Partial Pressure	244
10-3 Kinetic Molecular Theory of Gases	249

CHAPTER 11: Phases of Matter	
11-1	Interactions Between Atoms and Molecules 258
11-2	Phase Changes in Pure Substances 266
11-3	Liquid Phase – Vapor Phase Equilibrium 271
11-4	Cubic Unit Cells of Crystalline Solids 275
CHAPTER 12: Solutions and Their Properties	
12-1	Solutions 282
12-2	Colligative Properties 287
CHAPTER 13: Chemical Kinetics	
13-1	Rates of Chemical Reactions 293
13-2	Reaction Mechanisms 303
13-3	Activation Energy and Catalysis 312
CHAPTER 14: Thermodynamics	
14-1	Spontaneous Change and Entropy 321
14-2	Entropy of the Universe and Gibbs Free Energy 327
CHAPTER 15: Chemical Equilibrium	
15-1	Dynamic Equilibrium and Le Châtelier’s Principle 333
15-2	The Reaction Quotient & Equilibrium Constant 339
15-3	Free Energy and Chemical Equilibrium 343
15-4	Solving Equilibrium Problems: The RICE Table Methodology 349
CHAPTER 16: Acids and Bases	
16-1	The pH Scale and Water Autoionization 356
16-2	Strong and Weak Acids and Bases 363
16-3	Finding pH for Salts and Polyprotic Acids and Bases 372
CHAPTER 17: Buffers, Titrations, and Solubility Equilibria	
17-1	Buffer Solutions 379
17-2	pH in Acid – Base Titrations 386
17-3	Solubility and the Solubility Product 400
CHAPTER 18: Electrochemistry	
18-1	Standard Reduction Potentials and Electrochemical Cells 406
18-2	Electrochemical Stoichiometry and the Nernst Equation 416
CHAPTER 19: Transition Metals and Coordination Compounds	
19-1	Coordination Compounds: An Introduction 422
19-2	Coordination Compounds: Magnetism & Color 428
CHAPTER 20: Organic Molecules	
20-1	Functional Groups 437
20-2	Polymer Chemistry 443
CHAPTER 21: Biological Molecules	
21-1	Amino Acids and Proteins 450
CHAPTER 22: Nuclear Chemistry	
22-1	Nuclear Chemistry: Binding Energy 457
22-2	Radioactivity 468
22-3	Rates of Radioactive Decay 473
APPENDICES	
Appendix A	Units and Physical Constants 483
Appendix B	Secrets for Success in General Chemistry 487
Appendix C	How Your Brain Works: Implications for Learning Chemistry Efficiently 488
Index 489
List of Models 493
